

MANISH JAISWAL

Full-Stack & AI Engineer | India-based, Open to Global Remote

manish30007@gmail.com • +91-9871172482 • Delhi, India • [GitHub](#) • [Linkedin](#) • [Portfolio](#)

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, Python, C++, React.js, Angular, Node.js/Express.js, Flask

Backend & APIs: REST APIs, WebSocket, Socket.IO, OpenAI API, Stripe, Whisper, Google TTS, Pinecone (RAG)

Cloud & DevOps: Google Cloud Platform (Compute Engine, Cloud Run, Cloud Storage), Electron, Netlify

Databases & Tools: MongoDB, Neo4J, SQL, Git/GitHub, Postman, VS Code

CS Fundamentals: OOP, DBMS, DSA (500+ problems solved)

EXPERIENCE

Software Engineer — [StenopeAI](#) | [Tisa Legal Media](#)

June 2025 – Present

- Built StenopeAI, a real-time and post-processing AI transcription platform for high-accuracy multi-speaker environments (legal proceedings, meetings)
- Developed a scalable audio ingestion pipeline using chunked uploads to Google Cloud Storage, handling recordings 8+ hours long
- Architected backend services on GCP (Compute Engine, Cloud Run) with REST APIs and WebSocket communication for real-time updates
- Built collaborative transcript editor using Collabora Online, enabling live editing and speaker annotation
- Implemented AI-powered transcript enhancement pipeline using OpenAI APIs for grammar correction, missing text recovery, and speaker attribution
- Engineered cost-optimized transcription workflows combining real-time and batch processing to reduce operational costs while maintaining accuracy
- Developed cross-platform desktop app (Electron) alongside web app (React + Netlify), ensuring consistent UX across environments
- Integrated Stripe billing and usage-based pricing, including tax handling and subscription workflows
- Built offline transcription capability using Vosk for on-device processing; implemented hybrid online/offline architecture for privacy-sensitive use cases
- Managed end-to-end product lifecycle: architecture, development, deployment, debugging, and user feedback iteration

Software Engineer — [Cultirro](#)

Feb 2023 – June 2025

- Core team member building Risely, an AI-powered leadership development platform used by managers across organizations
- Built a leadership-centric AI chatbot using OpenAI API to help users enhance leadership skills and tackle management challenges
- Implemented RAG workflows with OpenAI, Pinecone, Node.js, and Angular — grounding chatbot responses in relevant product knowledge to improve answer quality
- Designed and maintained session-based chat storage in Neo4J to facilitate continuity across conversations, significantly enhancing user experience
- Employed Socket.IO to stream responses from OpenAI API backend to frontend in real time, improving perceived performance and responsiveness
- Integrated Whisper (OpenAI's ASR) to transcribe user voice input, and Google TTS API for audio output — transforming the product into a fully voice-enabled assistant platform
- Optimized server-side performance using Node.js, resulting in a 25% decrease in page load time
- Visualized user performance trends using Chart.js, providing actionable insights within the application dashboard
- Conducted regular code reviews and enforced best practices, resulting in a 35% decrease in bug reports
- Contributed to API design, database schema decisions, and frontend architecture using Angular, ensuring a scalable and maintainable codebase

EDUCATION

B.Tech in Electronics and Communication Engineering

2019 – 2023

Deenbandhu Chhotu Ram University of Science and Technology, Murthal, Haryana | GPA: 7.8
